REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The claimed invention is drawn to the following:

1. (Currently Amended) A method of making a lithographic printing master comprising the steps of:

- providing an imaging material which comprises a lithographic base having a hydrophilic surface and a non-ablative image-recording layer comprising hydrophobic thermoplastic polymer particles which is removable in a single-fluid ink or can be rendered removable in a single-fluid ink by exposure to heat ~~or light~~;
- image-wise exposing the image-recording layer to heat ~~or light~~; and
- processing the material by supplying to the image-recording layer a single-fluid ink which is an emulsion of an ink phase and a non-aqueous polar phase.

17. (New) A method of making a lithographic printing master comprising the steps of:

- providing an imaging material which comprises a lithographic base having a hydrophilic surface and a non-ablative image-recording layer comprising an aryldiazosulfonate polymer which is removable in a single-fluid ink or can be rendered removable in a single-fluid ink by exposure to light;
- image-wise exposing the image-recording layer to light; and
- processing the material by supplying to the image-recording layer a single-fluid ink which is an emulsion of an ink phase and a non-aqueous polar phase.

The rejection outstanding in prior to the filing of the RCE on May 18, 2004 was a rejection under 35 U.S.C. 103(a) as unpatentable over VERMEERSCH et al '128 in view of KINGMAN and TENG '222 for claims 17-28 and a rejection over VERMEERSCH et al '750 in view of KINGMAN and TENG '222.

The arguments by applicant have been carefully considered with respect to the material differences in the prior art references and the appropriateness of their combination under 35 U.S.C. 103. Upon further consideration the differences as expressed in the arguments are convincing and the rejection as given in the previous Office actions will not be repeated. The

Art Unit: 1752

prior art reference to TENG '222 ,which discloses the use of a single fluid ink for developing lithographic printing plates is not seen to be properly combinable with the VERMEERSCH et al '128 or '750 references, accordingly the recited claims are seen as allowable and claims 1,2 and 6-28 are passed to issue.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
